---

### OBJECTIVE:

- I want to become an expert in software domain. Because I have learned the skill and in future I want to become an expert so that other people should see me as an inspirational person.

### EDUCATIONAL DETAILS:

- B. Tech Computer Science Engineering (Data Science) from Ravindra College of Engineering for Women in the year of passed 2021-2025 with 78.94%.
- Intermediate (MPC) from The Nandyal Junior College in the year of passed 2019-2021 with 79.2 %.
- SSC from Gowtham Model School in the year of passed 2018-2019 with 93%.

### TECHNICAL PROFICIENCY:

- **Languages:** C, Python, Java, HTML, CSS, (Basics)
- **Data Bases:** SQL
- **Operating System:** Windows, Linux, Tableau
- **Framework:** Django

### MINI PROJECT:

- **Title:** Random Password Generator  
**Description:** This HTML, CSS, and JavaScript create a simple yet interactive password generator. The CSS provides an attractive and responsive design, while the JavaScript handles the functionality of generating and copying the password. The user interface is intuitive, featuring a button to generate the password and another to copy it to the clipboard.

### PROJECT WORK:

- **Title:** Design and Development of Information Portal to Assist Tomato Producers.  
**Duration:** 8 months  
**Project Description:** In this project, farmers growing tomatoes can compare prices. They can check the price in one market and compare it with the price in another market. This will help them sell their tomatoes more effectively.
